

The Buna Liquid Smart® Alarm Sensor is a combination of capacitive and Buna float technology. The sensor will activate in the presence of liquid, and simultaneously identify if oil or water is present. The sensor has a solid-state, low current circuit.

Features

- NO/NC sensing capability
- Dimensions: 4.7" high x 1.6" wide x 1.5" deep
- Voltage: 12VDC
- Enclosure: Constructed of high impact, injected molded plastic
- Wire: Insulation-PVC, PE with Nylon rip cord, 18 AWG, UL listed
- Cord length: 20' (additional cord length available up to 300')

Applications

- Elevator sumps
- Transformer containment areas
- Underground vaults
- Manufacturing facilities
- Any application where there is a need to remove water
