

## Remote Oil Smart® Alarm Panel (Model #RSA-100)

BN	IM604
REV	1011

### Remote Oil Smart® Alarm Panel:

The Remote Oil Smart® Alarm Panel is a plug and play secondary alarm that works in conjunction with any Oil Smart panel. The system is complete with visible mounted features and dry contacts for remote monitoring. The alarm will activate with the presence of any liquid and will identify if oil or water is present.

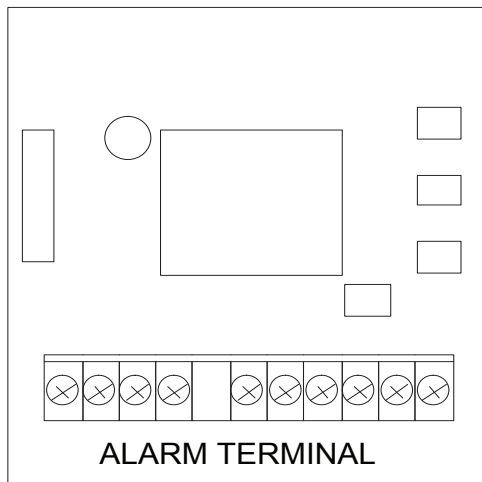

### Features:

- Includes 100' cord that shall wire to main panel. Optional length available up to 200'.
- Indoor/Outdoor NEMA 4X Heavy Duty Polycarbonate Enclosure: 6"x5"x2.5", Color Gray Material 94V-2, Polycarbonate, IP-56 Rating
- Voltage: 120 VAC Single Phase 60Hz
- CSA International Certified No. 229294
- External Mounting Feet: Quick Installation.
- High Liquid Alarm with Test and Silence Features, Red Beacon Alarm Light, White Light for Water Present, Yellow Light for Oil Present, High 85 Decibel Audible Alarm. Complete Dry Contacts for Each Alarm Condition.
- 10' Heavy Duty Power Cord
- Easy Accessible Terminal Block (remove back panel)

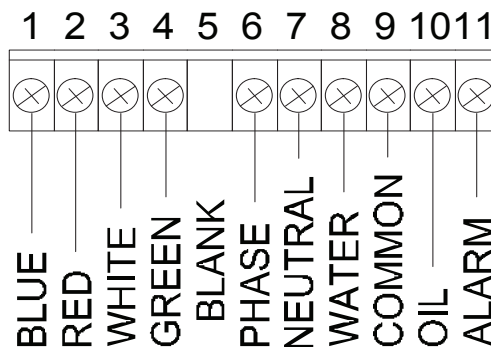

### Panel Installation:

1. Caution: To maintain the NEMA 4X rating, make all wiring connections with seal tight cable grips or conduit connections to be supplied by end user.
2. Determine mounting location for control panel. Mount panel using mounting screws provided.
